

TABLE OF CONTENTS

Upper bounds for packings, the Lovász theta number and harmonic analysis of compact groups. Christine Bachoc	1
Construction of a Hash Function for Estimating the Hamming Distance Between Binary Vectors. Vladimir B. Balakirsky, Anahit R. Ghazaryan, A. J. Han Vinck . . .	6
Linear Covering Codes of Radius 2 and 3. Alexander Davydov, Massimo Giulietti, Stefano Marcugini, Fernanda Pambianco . .	12
A simple algorithm for decoding both errors and erasures of Reed-Solomon codes. Sergei Fedorenko	18
On decoding of interleaved codes. Grigory Kabatiansky, Stanislav Osmolovsky . . .	22
Some designs and codes from the groups $PSL_2(q)$ for certain q . M. R. Darafsheh, A. Iranmanesh, R. Kakheshani	27
Some Results on List Decoding of Interleaved Reed-Solomon Codes with the Extended Euclidean Algorithm. Sabine Kampf, Martin Bossert, Sergey Bezzateev .	31
Embedding in a perfect code. Sergey V. Avgustinovich, Denis S. Krotov	37
On the Expanding Properties of Gallager’s LDPC Matrices. Victor Zyablov, Maja Lončar, Rolf Johannesson	40
Lower bound on the number of different partitions into q -ary perfect codes. Faina I. Solov’eva, Anton V. Los’	51
Weighted l_1 Superimposed Codes. Wei Dai, Olgica Milenkovic	56
Two different approaches to multistage decision-making in asynchronous OFDMA. D.S. Osipov	71
Punctured Reed-Solomon codes at the transport layer of digital networks. V. Sidorenko, F. Shen, E. Krouk, M. Bossert	76
On the Relationship of Some Reed-Solomon Decoding Algorithm. P. Trifonov . . .	83
One-sweep APP decoding algorithm for binary block codes with reduced trellis memory. T. Johansson, A. Trofimov	88
Cycle codes of graphs and MDS Array codes. Oriol Serra, Gilles Zémor	94
